MUD FLAPS

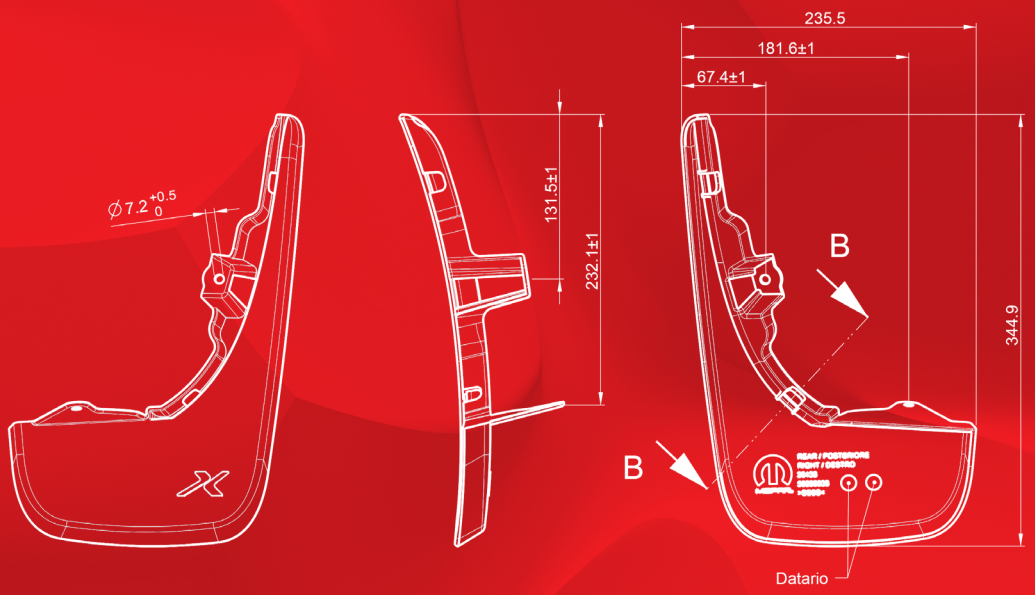
TAILORED MUD FLAPS

Mud flaps represent the perfect combination between care of the design and attention to safety, mostly other's.
One of its principal characteristics is surely its help to stop snow, water or debris to be thrown towards other vehicles behind you during a travel in tough conditions.
For over 20 years, G3 has been developing and realising solutions suitable to each kind of vehicle, with the right care and dedication such an important component deserves.
From CAD data and through a constant cooperation with the customer, we realise front and rear mud flaps only using state-of-the-art materials and respecting current regulations.



FEATURES

SEBS
MATERIAL

MATERIAL

SEBS = Styrene Ethylene Butylene Styrene.
High performance thermoplastic material.

V
QUALITY TESTED

QUALITY TESTED

Our products respect all the severe tests requested by automobile companies.

TAILORED

TAILORED
