Passione e produzioni italiane

La produzione G3 è il risultato evidente della storia manifatturiera e del design italiano. I nostri prodotti nascono a Reggio Emilia, nella splendida regione Emilia Romagna. Ancora oggi si possono sentire all'interno dell'azienda le origini legate alla tradizione anche se, durante questi 40 anni, G3 ha cercato di migliorare continuamente il proprio processo e la propria capacità di innovare. L'ultimo risultato di questo percorso è rappresentato dall'intera gamma di portagio per autovetture e veicoli commerciali. I prodotti sono sviluppati e concepiti all'interno dell'azienda e vengono prodotti al 100% nei nostri stabilimenti in Italia.

Italian passion and manufacturing

G3 production is the outstanding result of Italian Design and Engineering. Our products are manufactured in Reggio Emilia in the Region of Emilia Romagna. One still can feel the traditional origins inside the company and during these 40 years G3 continuously run to improve its process and its innovation capacity. Our last goal of this work is the roof bars' complete range for vehicle and commercial vehicles. All the products are developed and designed under firm's responsibility and all the production's step are 100% made in Italy.

Massima flessibilità

Il nostro obiettivo è essere in grado di guidare il processo e seguire le richieste: vogliamo soddisfare le richieste del mercato

Gestione della qualità

Il sito produttivo e i processi sottostanno alla normativa ISO 9001:2008 dal 1998.

Progettazione su misura

Siamo in grado di seguire tutto il processo legato ad un prodotto, dall'idea alla produzione, raggiungendo la miglior soluzione in termini di adattabilità.

Produzione interna

Tutti i nostri prodotti sono orgogliosamente realizzati al 100% in Italia per dare soluzioni su scala globale.

Maximum Flexibility

Our aim is to be able to lead the process and to follow your request: we want to meet your needs.

Quality Management

Production site and processes are certified ISO 9001:2008 since 1998.

Specific Engineering

We follow all the processes, from the concept to the production, to reach the best fitting solution.

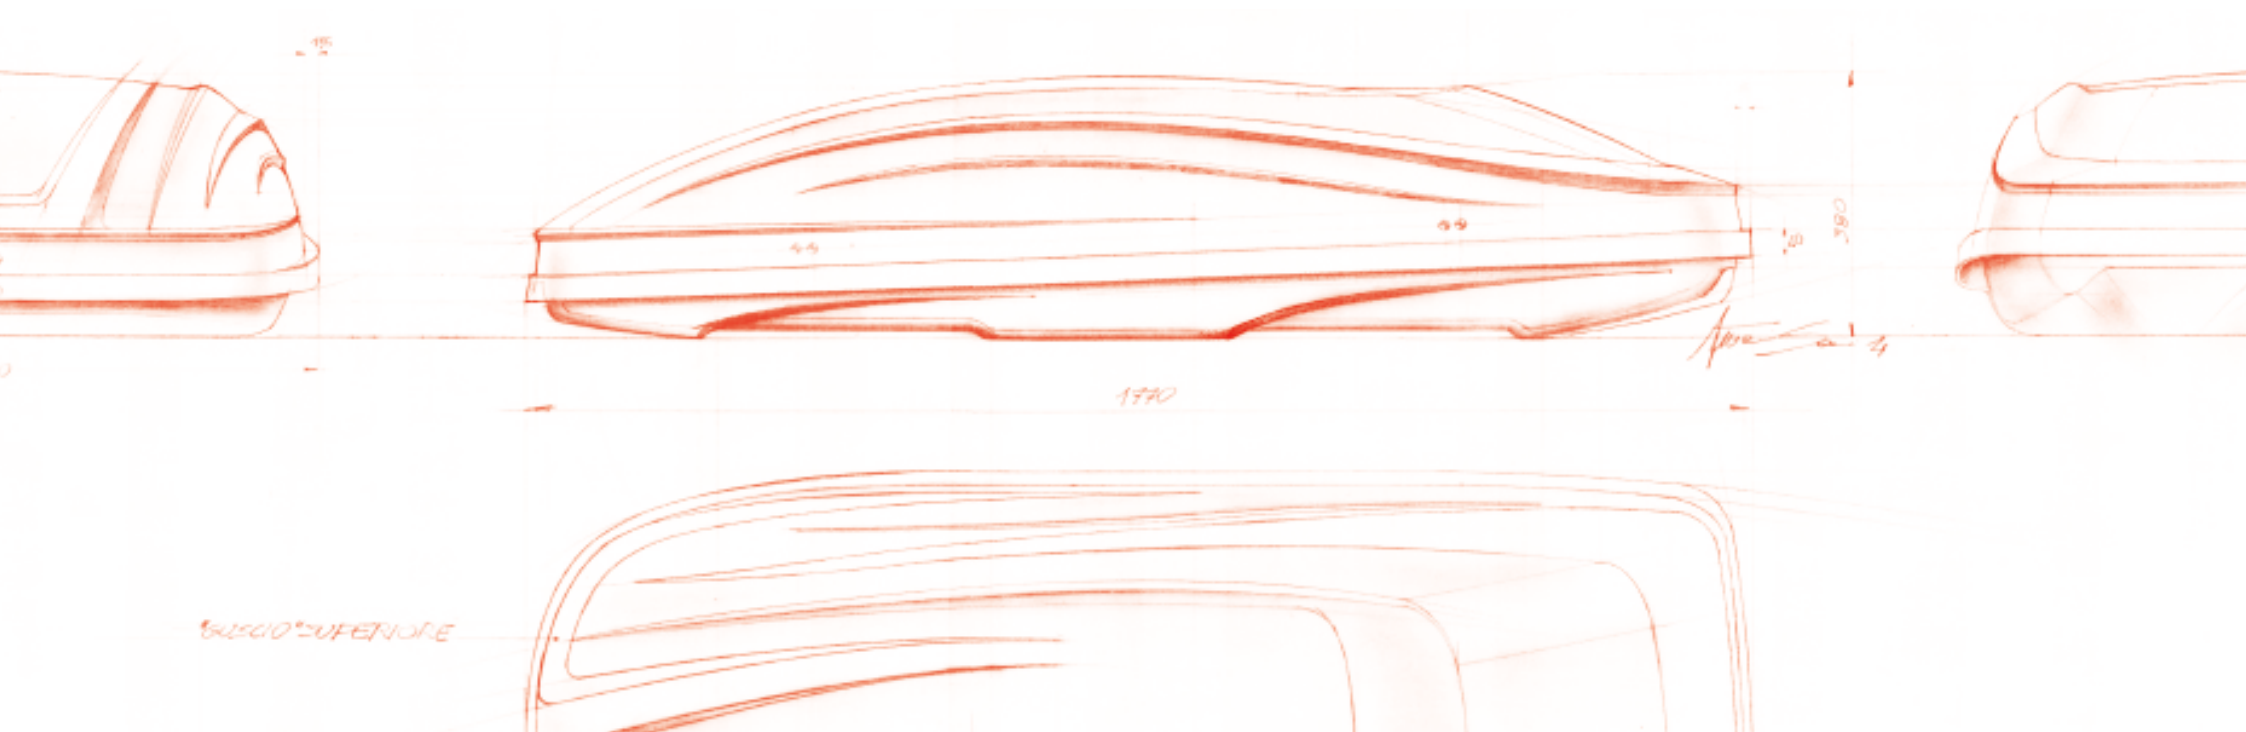

Domestic Production

Our products are proudly 100% made in Italy to give worldwide solutions.

Il nostro know-how

Le origini artigianali continuano a respirarsi nell'azienda, ma G3 negli anni ha dovuto munirsi anche di processi di ricerca e sviluppo all'altezza dei clienti di livello mondiale che è stata in grado di attirare a sé. Ricerca delle linee migliori, cura del dettaglio, costanti investimenti nello studio dei materiali sono le direzioni in cui l'organizzazione si dirige, mantenendo alto l'interesse di offrire ai propri clienti prodotti all'avanguardia, senza mai trascurare il gusto estetico ed il design tipicamente italiani.

Our know-how

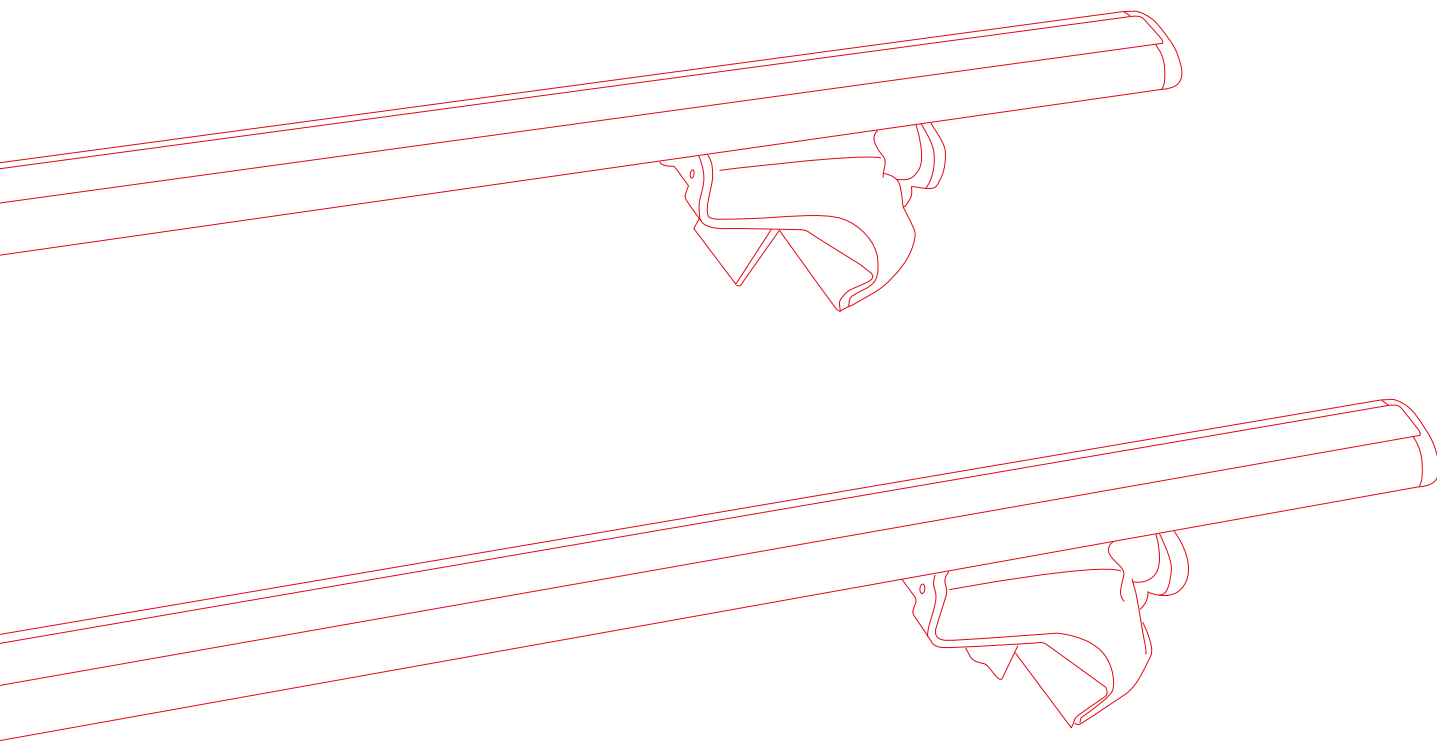

One still can feel the traditional origins inside the company and during the years G3 familiarised with new R&D processes to rank with clients of world level that it succeeded to attract. Research on better lines, care for details, constant investments in the study of the raw materials, these are the directions the organization follows, maintaining its interest to offer avant-garde products without ever neglecting the typical Italian style and design.

ISO PAS

ISO/PAS

Normativa di riferimento internazionale che racchiude tutte le principali normative Europee.

Questa raccolta di norme specifica i requisiti minimi di sicurezza validi per tutti gli accessori della categoria portaggio (barre porta tutto, box, ecc.) che vengono posizionati sul tetto di automobili e veicoli commerciali (fino a 3.5 ton.)

ISO/PAS

International reference standard that encloses main European regulations.

This collection of standards specifies the minimum safety requirements for all load mounting above the roofs of cars and commercial vehicles (until 3.5 ton.)

LA SOLUZIONE DEFINITIVA PER OGNI VETTURA SENZA CORRIMANO

La gamma Pacific è la soluzione di carico proposta da G3 per le vetture con tetto senza corrimano. I nostri tecnici si sono concentrati sugli obiettivi ormai dichiarati dei prodotti G3: semplicità di montaggio, soluzioni innovative e un alto tasso di adattabilità. Questo sistema di portaggio è in continuo aggiornamento ed è mirato a seguire tutte le nuove uscite di autovetture in commercio con velocità e qualità. La linea Pacific sarà composta da due sole componenti: la barra e il kit specifico di fissaggio a tetto. La barra sarà disponibile in tre lunghezze e sarà uguale per tutte le vetture. Il kit di fissaggio sarà concepito e disegnato ad hoc per ogni singola vettura. Al cliente rimane solo il compito del semplice montaggio e il piacere della soluzione ad ogni tipo di bisogno di carico.

THE ULTIMATE SOLUTIONS FOR EVERY CAR WITHOUT RAILING

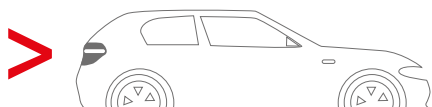

Pacific complete range is G3's loading solution for the cars without railing on the roof. Our technicians worked hard on the targets declared by G3 products yet: easy mounting systems and innovative ideas with a high level of adaptability. This loading system is going to be continuously updated following the new released cars with high speed and quality. Pacific range will be composed only by two products: the roof bar and the specific fixing kit for the roof. The roof bar will be available in three different lengths and will be the same for all the cars. The specific fixing kit is going to be developed and designed ad-hoc for each car model. We only leave to our customers the task of easy mounting and the solution's pleasure for every kind of load.

PER TUTTI I RAILING APERTI

Le barre Open di G3 sono state sviluppate nel design e nei dettagli tecnici con l'attenzione riservata a tutti gli altri prodotti dell'azienda: lo scopo è quello di fornire un prodotto adattabile a tutti i tipi di automobili munite di railing longitudinale aperto, di semplice installazione ed immediato utilizzo. A differenza di molti altri prodotti già in commercio, le open verranno vendute già completamente assemblate ed occorrerà solamente fissarle all'automobile con un semplice meccanismo manuale, senza bisogno di utilizzare alcun tipo di attrezzo. Le barre saranno fissate al veicolo grazie a 4 piedi di fissaggio che rappresentano anche un valido sistema antifurto grazie alla chiusura gestita da un'unica chiave. Dopo uno studio condotto sulle automobili in circolazione, le open saranno prodotte in tre diverse dimensioni: 110 cm, 127 cm e 145 cm, mentre le barre open basic sono disponibili solo con una lunghezza di 122 cm e nel solo materiale acciaio con guaina in plastica. Tutto questo per soddisfare il più ampio range possibile di autovetture in modo efficiente ed elegante.

FOR EVERY OPEN RAILING ROOF

The G3 Open roof railing bars have been developed with the same great attention in design and technical details as for all the other G3 products. The purpose is to provide an item suitable for all types of railing cars : with easy to mount and with an immediate use. Unlike many others products present on the market yet open is going to be sold already assembled. You need just to fix on car roof with a simple manual mechanism. No need to use any type of tool. The G3 Roof-bars are fixed on the car roof through 4 mounting-feet that have to be closed by a antitheft-key ensuring in that way the security of your roof box. After a detailed research of all cars in circulation, we chose to produce open in three following application sizes: 110 cm, 127 cm e 145 cm, while the open basic bars is available only in 122 cm lenght and only in plastic covered material. All this for satisfy the widest possible range of cars efficiently and stylish.

ASSOLUTAMENTE INNOVATIVO

Il sistema Clop è progettato per essere adatto al 100% delle vetture con corrimano chiuso e alla gran parte di quelle con corrimano aperto.

E' lo stesso nome di questo prodotto a voler sintetizzare questa duplice natura: CLOSE + OPEN.

Anche questo prodotto racchiude le caratteristiche presenti in tutti i prodotti G3: sicurezza, versatilità e praticità di montaggio.

Clop viene infatti fornito premontato: in questo modo il cliente potrà completare l'installazione in pochissimi minuti.

ABSOLUTELY INNOVATIVE

Clop system is designed to fit on 100% of the circulating vehicles with closed railing bars and the most with opened ones.

Starting from the name this product aims to synthesize this dual nature: CLOSE + OPEN.

Also this item contains the typical G3's characteristics: safety, versatility and ease of assembly.

Clop is sold preassembled: indeed the user will easily complete the mounting in few minute.

SISTEMA DI PORTAGGIO PROFESSIONALE

Le barre in alluminio atlantic.pro sono concepite per soddisfare tutte le esigenze di chi lavora con un veicolo industriale e ha la necessità di caricare e trasportare attrezzatura ingombrante. In questo prodotto il design è attentamente studiato per ridurre al minimo la rumorosità durante il tragitto e per valorizzare l'estetica dei dettagli: ogni singola barra in alluminio ha una canalina ricoperta da guaina in gomma per evitare lo scivolamento e aumentare il grip.

Scegliendo atlantic.pro si possono integrare le semplici barre di carico con molti accessori, tra i quali un sistema di sponde laterali che migliora le capacità di contenimento del tetto del vostro veicolo.

PROFESSIONAL RACK SYSTEM

atlantic.pro system is studied to satisfy all the worker's needs and the necessity to load heavy tools and bulky stuff. This system is carefully designed in Italy to reduce the noise on board and to underline the details' beauty. Every single roofbar has opened sides and a rubber part to improve the grip.

Choosing atlantic.pro you can upgrade the simple roofbars system with accessories: for example you can add a side profiles system to get better the restraint potential of your van.

Box tetto Roof boxes

SISTEMA DI APERTURA DUAL SIDE

L'apertura Dual Side permette di aprire il box da entrambi i lati per agevolare il montaggio, il carico e lo scarico.

I tecnici di G3 hanno sviluppato un sistema di doppia apertura laterale capace di migliorare ancora una volta le prestazioni della gamma di box G3.

Questa soluzione permette di aprire, con la stessa chiave, entrambi i lati del box per consentire un completo e più semplice accesso al box da tetto, rendendolo comodo in tutte le condizioni.

Il sistema di doppia apertura, oltre a rappresentare una soluzione fondamentale per le esigenze dei paesi con guida nella carreggiata sinistra, fornisce anche la possibilità di affiancare il box da tetto ad altri accessori sulle barre di portaggio.

Questa innovazione verrà inizialmente applicata da G3 ai box di fascia più alta andando così ad arricchire una gamma che già presenta finiture lucide, chiusura centralizzata e city crash test.

Il box G3, ancora una volta cerca di avvicinarsi alle sempre maggiori esigenze dei prodotti di portaggio, aumentando la versatilità e migliorando l'accesso ai bagagli senza mai perdere di vista praticità ed eleganza.

DUAL SIDE OPENING SYSTEM

The dual-side opening System permits you to open the roof box from both sides. It makes the mounting easier and facilitates its loading and unloading.

G3 engineers have developed this Both-side once again in order to improve the performance of G3 Roof box range.

This solution allows you to open both sides of the box with the same key.

You have better and easier access to the box in very comfortable conditions.

The Both-side opening system represents a fundamental solution for all the countries with left-lane driving, and provides in the same time the opportunity to fit the roof box in different position of your roof bars together with the other accessories.

To the begin this innovation will be applied only on the high-level G3 roof box series, enriching in this way a range that already offers very good-looking finishings, central locks and city crash tests certificates.

Once again the G3 roof box tries to fulfil the growing needs of its market, increasing the versatility and improving access to the loaded luggage in an always simple and elegant way.

PREFORATURA

Frutto della capacità innovativa dei tecnici di G3 è il pratico sistema di preforatura che contraddistingue la gamma di box tetto. E' sufficiente una penna a sfera! Semplice e veloce, permette al cliente di non dover maneggiare strumenti pericolosi capaci di procurare danni a se stesso o ad altre persone. Il risultato è ottimale, assolutamente migliore di qualsiasi altro presente in commercio: il sistema di preforatura migliora la precisione del montaggio e contribuisce ad aumentare la qualità del box G3.

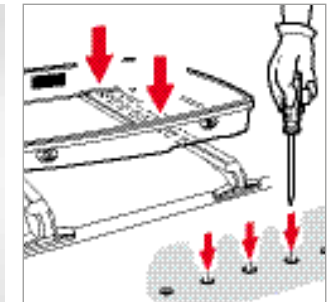

PRE-PERFORATION

Fruit of the innovation capacity of the technicians of G3 and of the practical system of pre-perforation which contradistinguishes the range of roof boxes.

A ball-point is enough! Simple and quick, the customer hasn't to manage dangerous instruments which can cause damages to himself or to others.

An optimum result, absolutely better than any other on the market: the system of pre-perforation improves the precision of instalment and contributes to increase the quality of the G3 box.

Dual Side

Box tetto Roof boxes

LA GAMMA

L'ampia gamma di box da tetto G3 è in grado di soddisfare ogni tipo di esigenza: dal bisogno di spazio per un maggiore comfort alla ricerca di prodotti con una linea accattivante e di tendenza. G3 propone una vasta scelta di modelli (che soddisfano in pieno tutti gli standard City Crash), di tutte le dimensioni e finiture, tra le quali i nuovissimi colori UK e camouflage.

RANGE

The wide range of G3 car roof box satisfy every need: from need space for higher comfort, to research fashion and endearing products. G3 offers a lot of models (satisfy all city crash standards), among which the new UK and camouflage colours.
